Visit : [nahumondangan.dev](#)

Motivated and service-oriented individual with a background in Business Management and I.T. Analysis. Currently serving as an I.T. Trainee at Rebus Technology Solutions LLC, with strong problem-solving, communication, and teamwork skills. Actively seeking opportunities in the I.T. or software development industry. Adaptable, eager to learn, and committed to studying any programming language or developer tool required to meet the company's technical needs.

EDUCATION

2024 - 2025

Business Management & Finance

British University
College

I am currently pursuing a Bachelor's degree in Business Management and Finance at British University College, where I am developing a strong foundation in core business disciplines, including financial analysis, marketing, operations, and strategic management. My studies emphasize both theoretical knowledge and practical application, preparing me for dynamic challenges in the business world.

Throughout my academic journey, I have honed skills such as critical thinking, data-driven decision-making, and effective communication. Additionally, I actively participate in group projects and case studies that simulate real-world business scenarios, allowing me to collaborate, lead, and solve problems in a team setting.

I am eager to apply the insights and skills gained during my studies to a professional environment, contributing to organizational success while continuing to learn and grow.

- Node JS

EXPERIENCE

NYU Abu Dhabi

I.T. Analyst Intern

As an IT Analyst Intern at NYU Abu Dhabi, I gained invaluable hands-on experience in a dynamic and multicultural environment, working closely with a team of professionals to deliver effective IT solutions and support.

- Provided technical support for hardware, software, and network systems, ensuring uninterrupted IT services for students, faculty, and staff.
- Diagnosed and resolved system issues, including troubleshooting connectivity problems, software glitches, and hardware malfunctions.
- Collaborated with the IT team to implement system upgrades and conduct routine maintenance to optimize performance and security.
- Assisted in monitoring and improving cybersecurity protocols to safeguard sensitive data and maintain compliance with university standards.

Rebus Technology
Solutions LLC - SPC

I.T Trainee

During my time as a Software Developer, I contributed to building practical software solutions in a fast-paced, collaborative environment while also leading solo projects from concept to deployment.

- Developed and maintained multiple websites, focusing on responsive design, performance, and user experience.
- Independently designed and built a full-featured E-Learning application, managing both frontend and backend development.
- Created a Construction management app, including UI/UX design, functionality planning, and deployment.
- Integrated software features with existing systems and optimized applications for efficiency and scalability.
- Produced thorough documentation, including technical procedures and user guides, to support end-users and future development.
